Story

Codecool is expanding to a new location and they want to celebrate it by releasing a news article. One news company is glad to take the job, but their developers left the task incomplete and went on vacation. After some asking around, they figured out that only you have the potential to finish it!

Tasks

Do you have what it takes to save the news article release?

Fix it

The news company developers were a bit sloppy in their last day of work before their vacation and made a bit of a mess with the current state of the news article. Your job is to take their code as a starting point and fix the issues they couldn't solve before disappearing.

Acceptance criteria

- HTML and CSS are used to produce the article's result.
- The news article is displayed just as in the screenshot *s1* below.

Finish it

Codecool's CEO is very excited about expanding to the new location. Complete the news article with his fascinating testimony.
- *The information provided for this news section is obviously fake ;)*

Challenge

Solo activity

Acceptance criteria

- HTML and CSS are used to produce the article's result.
- The news article is displayed just as in the screenshot *s2* below.
- The section's text is the one provided in the text *t1* below.

Extend it (optional)

The news company editor is impressed with your results so far and would like this article to become even more special for their readers. You are tasked with expanding the content and altering the design as you may want.

Acceptance criteria

- You decide what else to add or which things to change, as long as the text content of the previous two tasks remains unchanged.

Resources

- Use the *index.html* and *style.css* files provided in the GitHub repository as the starting point of this challenge.
- You can find the Full Stack course background image, the Codecool black and white logo and the yacht picture in the repository as well.
- Use [CodeSandbox](https://codesandbox.io/) as your development environment.

CODECOOL IS IN TOWN!

AND IT BRINGS ITS FULL STACK COURSE WITH IT

[Full Stack course](#)[CEO's Joy](#)

CONTENT

Python, PHP, Java, HTML, CSS, JavaScript, SQL, Java, Spring, C#, ASP.NET, ORM and more.

PRICE

€ 470 x24 Months

[Job Guarantee](#)[Scholarship](#)

Offline, at the Campus
12 Months
Mo - Fr (full day)
Start: **October 2021**
In German and English

Full Stack development course

Possibly the only technical course you will ever need.

Dive in with us into the world of programming and get yourself ready in one year for your future technical career.

Modules

Months 1-3

Prog Basics

The first steps of your programming journey will be done in Python. This friendly programming language is used to create web applications, data analysis and machine learning. Additionally, you will practice how to write clean code, improve your problem solving skills and how to use the GIT version control tool.

Months 4-6

Web

Here you start creating web applications, learning basic use of databases and SQL, and many more things related to front-end technologies, like HTML, CSS and Javascript. Additionally, you will also build up your knowledge of giving presentations, SCRUM and project management.

Months 7-9

OOP

Here you will dive in into the Java programming language and into much more complex applications. Practicing the fundamentals of object oriented programming and the SOLID principles is key in this module. Additionally, you will increase your code quality with testing and extend your knowledge of databases and SQL.

Months 10-12

Advanced

We prepare you for future job interviews. Complex topics will become part of your daily routine, like multithreading, data structures and transactions in SQL. You will learn a back-end framework - Spring or ASP.NET. You will specialize yourself further with other technologies, like Java, C# or PHP, React, DevOps and automated testing.

Challenge

s2

The CEO's Joy

After a cohort of 30 students enrol in this brand new course the revenue gains will reach €338.400, which is exactly what the CEO needs in order to buy his new two-story yacht.

Longer than half a year has he waited until he could fulfill his short term dream. What he would define as an unbearable waiting.

"I thought I wanted to purchase my second Ferrari first, but then I came to my senses." - Says the visionary sitting at the top of Codecool.

Once the preparations are ready and the butlers have perfumed the towels, they will be good to go!

"Papi, papi Can we bring Sebastian and Patsy with us? - Ask his children enthusiastically, referring to their close playground pals: their ponies.

The CEO has expressed his concern of space limitations after hearing his children demands. But surely the man who has brought incredible success to Codecool can come up with a fascinating solution. Or also he could decide to wait just a bit longer and buy an even bigger yacht.

"We will cross that bridge when we get there. - Shares the pioneer as his final statement in the matter.
